Application Install Guide

Before You Start

Recommended Service Pack levels are as follows:

Microsoft Windows XP -	Service Pack 3
Microsoft Windows Vista -	Service Pack 1
Microsoft Windows 7 -	Latest updates

Required User Access Rights

The install may require the user to have Admin Rights on the machine depending on your local security policies

OR

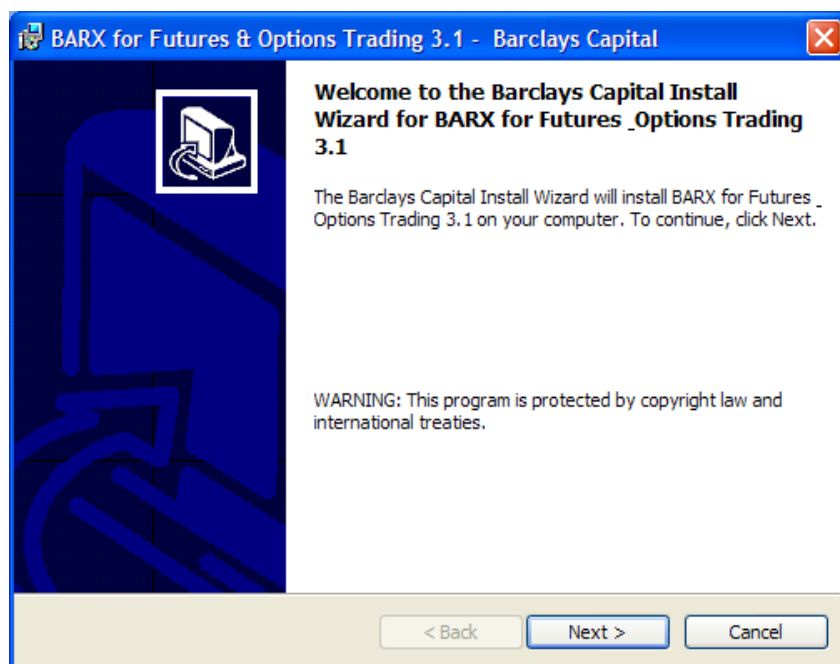

The Microsoft Windows Installer must be set to “Always Install with Elevated Privileges”.

Download Latest Software

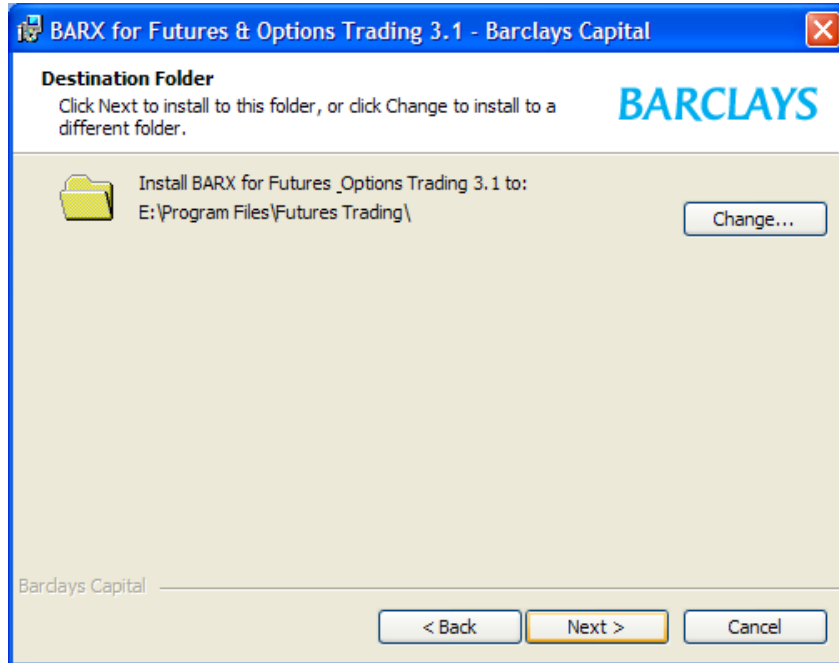

Available from <http://www.barx.com/futures/support>

Download to a local drive and then double click to run it.

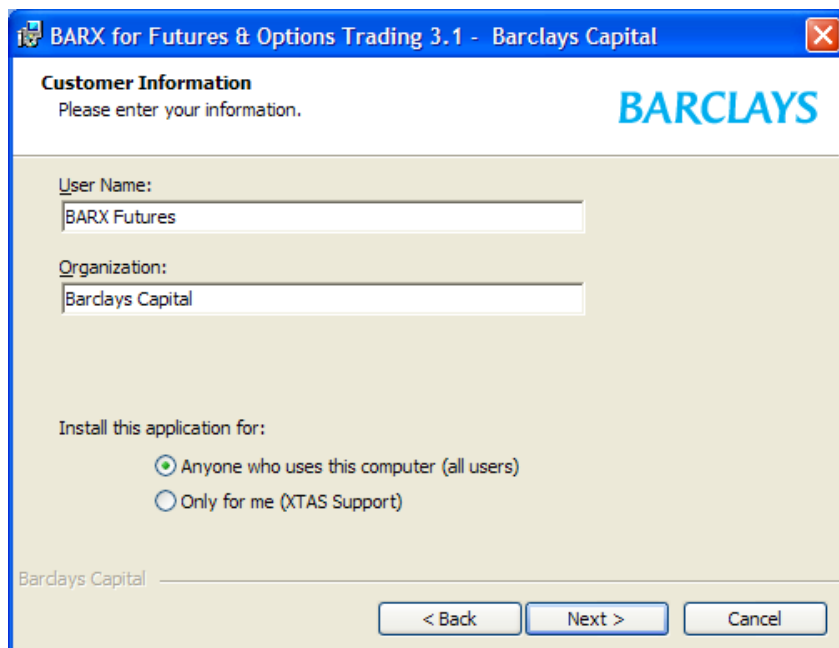

Step 1: The below screen will appear after the executable has been run. Please select ‘Next’.

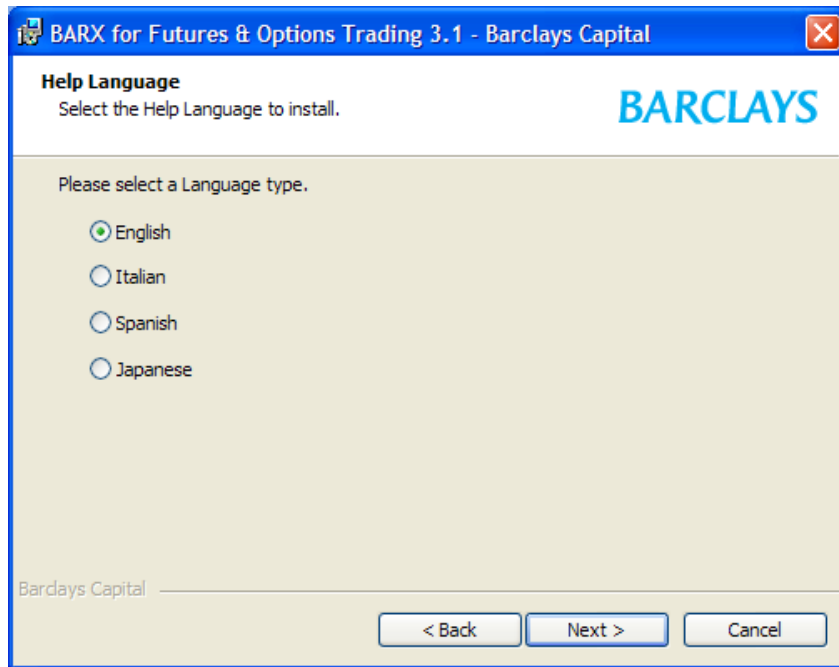

Step 2: The below screen indicates where the application will be installed. We recommend you accept the default. If you need to install to a different directory please contact your local BARX Futures Support team for advice.

Step 3: Enter your information and the fields will be auto-populated from your Microsoft Windows settings.

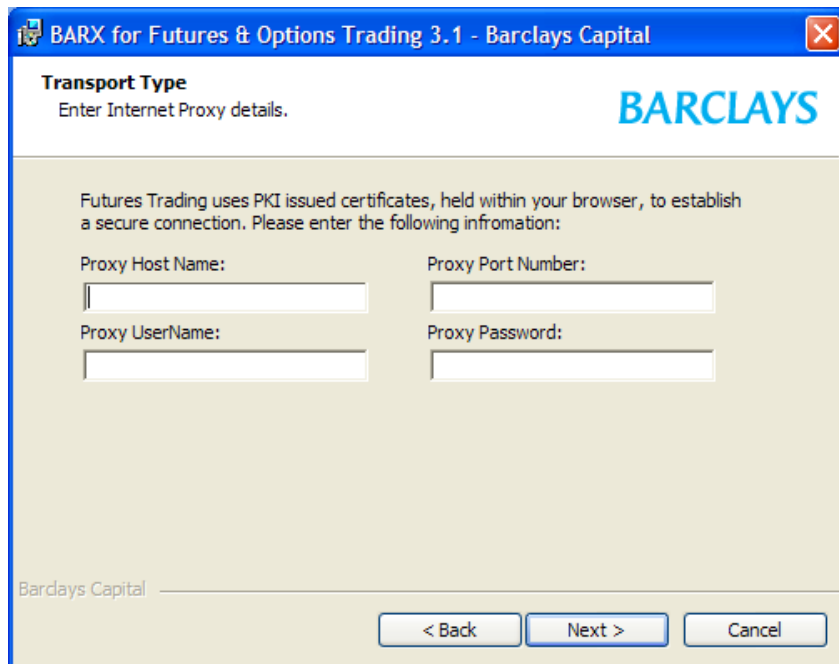

Step 4: Select the Language you wish the application to display when installed. This option cannot be undone. A re-install will be required to change this setting.

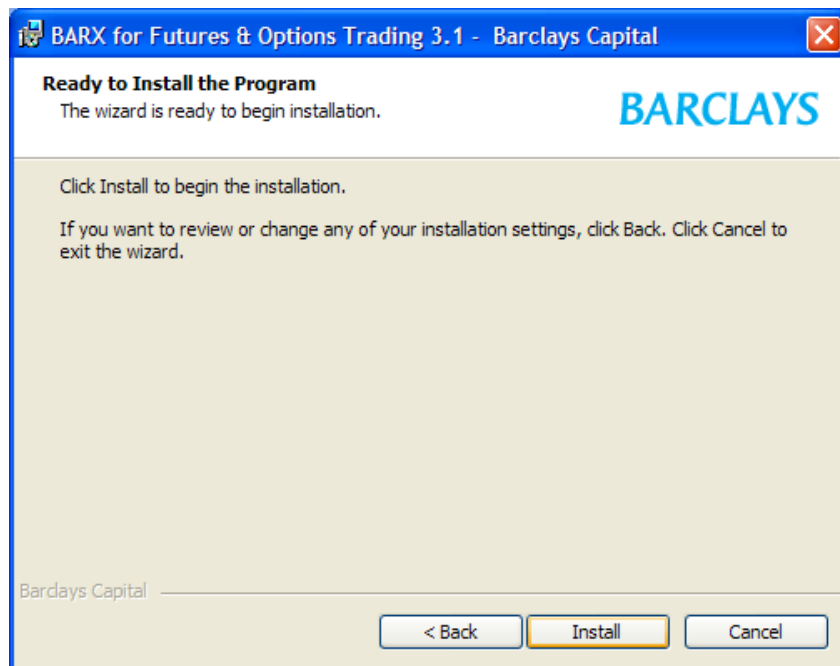

Step 5: If your network requires you to go via a proxy to access the Internet put the details in here. If they are unknown leave them blank as they can be added later.

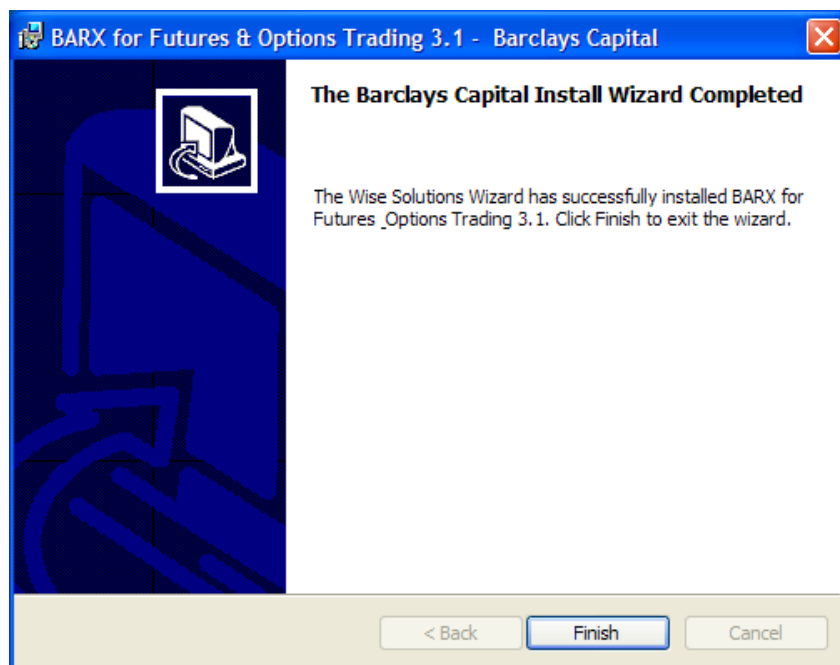

If you are using a leased line, leave them blank.

Step 6: Select 'Next' to accept all the settings before you install.

Step 7: The below screen confirms that the install is complete.

Post Install Tasks

User Privileges

The user will need to have 'Modify' rights to the following directory & sub-directories.

<C:\Program Files\Futures Trading>

(This only applies if you restrict access to the parent directory).
